

KWL Table

What I Know — What I Want to Know — What I Learned

Active Learning Tool · Case: Mariana's Internship · Participant Material · [Anonymized Institution]

How to use this table

This table has three columns and is filled out at different moments of the short course. Each column has a specific purpose. Follow the instructions for each phase indicated by the instructor.

Phase	Columns	Instructions
PHASE 2	K and W	Fill out columns K and W after hearing Mariana's case and before the mini-lecture.
PHASE 3	During	You can add observations while conducting the Feed Archaeology.
PHASE 4	L	Fill out column L at the end of the short course, individually and in silence.

K — I Know	W — I Want to Know	L — I Learned
<i>What do I already know about algorithms, social media, or Mariana's case?</i> Examples to start: • Algorithms use past data. • Social media networks show what keeps us engaged. • YouTube personalizes for each user.	<i>What questions arose? What do I need to understand to explain what happened to Mariana?</i> Examples to start: • How does the algorithm decide what to show? • What is a data bias? • Is the feed of someone close to me different from mine?	<i>To be filled out only in Phase 4. Connect what you discovered in the Feed Archaeology with Mariana's case.</i>

Questions to Deepen Your Reflection

K — For the column of what you know:

- Have you heard about recommendation algorithms before? In what context? Have you ever noticed that YouTube or Instagram suggests content of a specific "type" to you? What did you already know about discrimination in the technology job market?

W — For the column of what you want to know:

- Why did Mariana's feed become so homogeneous? Did the algorithm "want" this, or is it an unintended consequence? Could this be happening to your feed as well? How could you verify this?

L — For the column of what you learned (Phase 4):

- What did you find in your own feed that you did not expect? What discovery surprised you the most? What would you do differently now? What could Mariana have done before the internship?

Remember: there is no right or wrong answer. What matters is the honesty of what you write — and the connection with what you observe in your own feed.
